

INSTALLATION WINDOWS

- 1 - Download the zip file containing the plugin you have purchased for Windows
2. UnZip the file you downloaded to your hardisk.
3. Double click on the installer and follow the instructions.

The installer uses these folders by default:

C:\Program Files\VstPlugins

C:\Program Files\Common Files\VST3

(if you wish, you can select another location to install your plugin)

Make sure they are configured in your DAW when doing the plugin scan.
